MASTERPULS MP200

The ultimate in comprehensive care, the MP200 provides more ways than any Masterpuls® unit to care for your patients. The MP200 has the ability to provide Cupping Therapy, Shockwave Therapy and Vibration Therapy, along with digital touchscreen technology all in one device; which is unique worldwide.

MASTERPULS MP100

The MP100 features a state-of-the-art handpiece with integrated operating controls for safer and more efficient patient treatments; a built-in high performance compressor for maximum power and effective results; and the added convenience of multiple handpiece capability.

MASTERPULS ONE

The new radial shockwave system MASTERPULS® ONE has been developed with a clear focus on maximum ease of use, compact design, high efficiency and perfect mobility.

The MASTERPULS® ONE is ideal for use as a compact and flexible shockwave starter model for the treatment of all standard indications.
